

Dräger Life Jacket 275N SOLAS Offshore

Inflatable lifejacket for adults. Approved and certified according to SOLAS MED, double compartment floating chamber with case made in high quality cover. Equipped with Buddy System. Double Automatic and Manual Activator (DAAM). Equipped with harness certified according to ISO 12401 and frontal safety D-ring. Smart, functional and comfortable donning. Designed for the maximum freedom and mobility on board during the manoeuvres in navigation.

Activation systems

Automatic activation (inflatable life jacket): in case of falling overboard the system is submerged and automatically activates the inflation of chamber. Manual activation is possible as well.

Manual activation: the system is activated pulling the proper lanyard.

Oral inflation: the chamber inflates just blowing inside the oral tube. The oral tube is present on automatic inflatable life jackets and on manual inflatable life jackets as well.

Accessories on demand

Emergency automatic light, anti-flame cover.

Spare parts

60 g CO2 gas cylinder. Double crotch strap.

Service

The mandatory service for this inflatable life jacket is each 12 months.
